

AGENTOS PLATFORM HQ · BR3EZE.AFRICA

Partner bots are the operating edge of a centrally governed platform.

AgentOS combines AI operations, billing, hardware inventory, tenant-scoped partner bots, and administrator policy into one control plane.

Concept architecture · supplied figures are illustrative

Shared capabilities create leverage across every tenant.

AI Core

GEMINI

- NeuralCube
- Q-NAP
- Sentinel

Billing

PLATFORM CAPABILITY

- Platform billing
- Partner ledgers
- Revenue share

Hardware and Inventory

PLATFORM CAPABILITY

- Bulk-buy MikroTik
- Dahua OEM
- LTE SIMs

AgentOS owns the runtime, policy, settlement, and audit boundaries. Partners receive capabilities inside an explicit tenant scope.

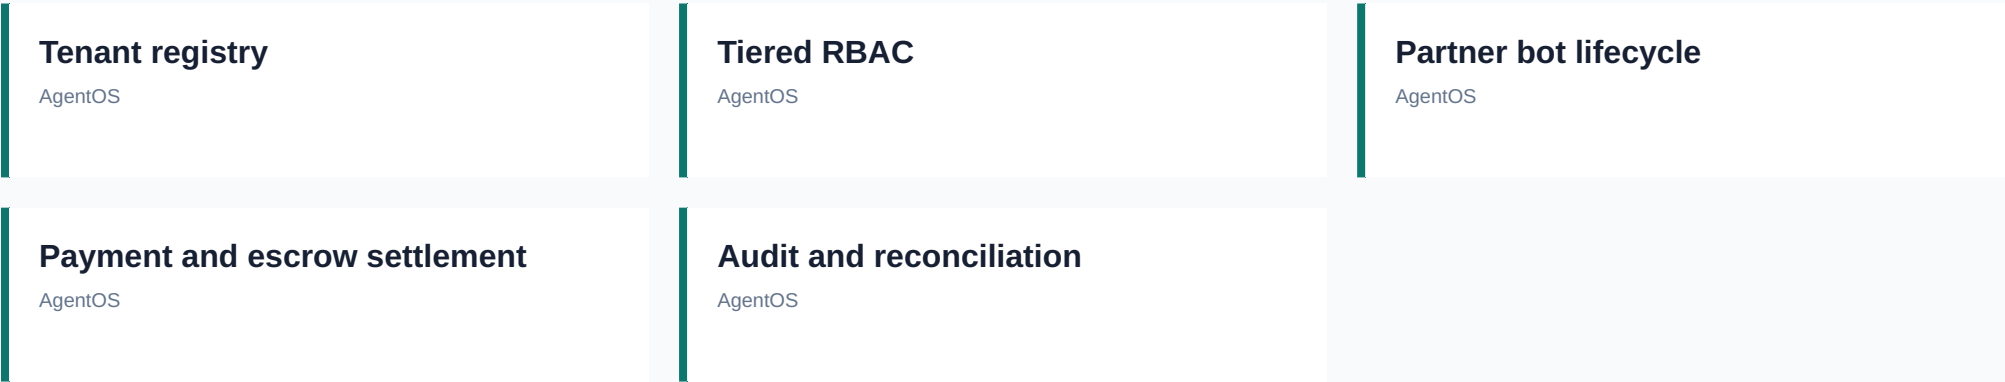

White-label partners operate regional service networks.

Partner	Region	Sites	Illustrative monthly value
Partner A	Nairobi	50	KES 450K
Partner B	Kisumu	23	KES 210K
Partner C	Kampala	12	UGX 180M
Partner D	Lagos	8	NGN 5M

The same model supports connectivity, CCTV, network operations, hardware distribution, and AI-assisted field support while keeping commercial records tenant-scoped.

Values shown exactly as supplied; not audited financial statements.

Admin control protects the partner layer.

Partner bot

Branded Telegram experience for approved plans, customer service, stock, wallet views, and payment initiation.

Partner-scoped

Short-lived state

No raw credentials

AgentOS control-plane boundary

Admin plane

Tenant lifecycle, RBAC, regional assignments, pricing policy, settlement, reconciliation, and audit review.

Platform-owned

Policy-enforced

Auditable
